### Health Services Special Diets/Special Passes

Patient Name	Inmate Number	Booking Number	Date of Birth	Today's Date	

The following information is to inform you how special diets and extra mattresses work:

Special Passes:

A pass for an extra mattress will ONLY be issued for women in the third trimester of pregnancy.

A pass for low bunk will be issued to persons with one or more of the following:

- Seizure disorder
- Weighing OVER 300 pounds
- Elderly
- · Have had surgery within the last month
- Have an artificial limb
- Have an acute Fracture
- · Neurological disease such as Parkinson's or MS which significantly impacts function

We will need to verify some things with you outside provider.

• Passes for extra blankets, clothes, or shoes will not be granted from medical

#### Special diets:

Medical diets such as, low fat, low cholesterol, or diabetic diets will be written by the provider if indicated and you complete a release of information, for an outside provider to verify the information.

Medical can only write for diets that are within the DOC dietary program guidelines. No exceptions!

If you have a food allergy, do not eat that food! You will need to sign a release of information, so we can verify the allergy with an outside provider.

### Inmate Blood Borne Pathogen Intake Education

<u> </u>				
Patient Name	Inmate Number	Booking Number	Date of Birth	Today's Date

The purpose of this information is to help you protect yourself from being exposed to blood borne pathogens.

Jails and prisons have an increased amount of HIV and Hepatitis. You can contract blood borne pathogens by being exposed to blood and body fluids: urine, feces, semen, etc. In general, any body fluid should be considered contaminated.

If you have to clean a cell, bathroom, do laundry, clean booking, or any other area which potentially has body fluid (including that which you cannot see), you should wear protective items such as: goggles, gloves, disposable gowns, face / spit shields, to reduce your risk of exposure. If there are blood spills on a floor, there are special spill kits in the health center that need to be used.

All of the above mentioned items are in the facility for inmate workers and or any inmate cleaning areas that could expose you. You can ask medical and or a correctional officer to get these items for you.

If you are exposed to blood or body fluids, you should report this to the security supervisor and medical immediately. An example of an exposure would be blood being splashed into your eye(s).

Washing your hands for 60 seconds, with warm water and soap after completing any task is a great way to prevent / limit exposure. In this environment, all inmates should wash their hands several times throughout each day, as a precautionary measure – regardless of working or task(s). If soap and water are not readily available, there is plenty of waterless hand sanitizer available for use.

If you have any further questions regarding blood borne pathogens, please ask a medical staff member.

### ANSWERS TO QUESTIONS YOU MAY HAVE ABOUT WHAT YOU CAN – AND CAN'T – EXPECT FROM THE MEDICAL DEPARTMENT

#### What health screening takes place when I arrive at a facility?

A nurse will review your health status when you arrive. It is important that you let us know about any medical, mental health, or dental condition you are being treated for. If your regular doctor has records which we can use, please let us know. You will be asked to sign the necessary permission for us to have copies.

A tuberculosis skin test is done on admission. Please let us know if you have had a positive test before. Later, you will meet with a provider for a further review of your medical history and physical examination.

#### How do I request medical attention?

Fill in a sick call slip. They can be obtained from your unit officer and are picked up regularly by medical department staff. State in a few words why you want to be seen. You don't need to go into details. Your unit officer or caseworker will assist you if writing the slip is a problem for you. You can keep the yellow copy of the slip for your own records if you wish.

#### Who will see me in the medical department?

Medical staff includes nurse's aides (LNA's), nurses (LPN's and RN's), and providers, who may be nurse practitioners, physician's assistants, or physicians. A nurse can work out many problems, and that will get them taken care of most quickly. Providers are available regularly but do not work full time, so there may be a longer wait for a provider visit. Please do not ask to be scheduled with a particular provider. We work together and try to coordinate our efforts for you, and we cannot make anyone a private patient of any one provider. This applies even if — as sometimes happens — you have been cared for by one of us in the community.

#### When and where do I get medication?

Location of medication administration will vary from site to site. You will be given site-specific instructions regarding medication administration times and locations at the time of your intake. This information is also posted in the living units. If a medication has been prescribed to take regularly and you do not want to take it, you will be asked to sign a form stating your refusal. If the order is for use "as needed" (the medical term for this is "p.r.n."), you still must take the medication at a med-line time. You should tell the nurse if you feel you need your p.r.n. medication; if you do not take it, you will not have to sign a refusal for it. There must be an order from a provider for any medication you receive.

#### Can I get a supply of my medication so I don't have to line up to get each dose?

Ordinarily no. Nitroglycerine for heart problems is provided three pills at a time. A few other medicines might be given out to self-carry.

Patient Name	Inmate Number	Booking Number	Date of Birth	Today's Date

2

#### What about an emergency?

Notify your unit officer. Medical staff is available in each facility 24/7. Arrangements will be made for you to be seen at a nearby hospital emergency room if there is an emergency which can't wait until a suitable provider is at your facility, or equipment and skills are needed that are not available at the facility.

#### Can lab tests and x-rays be obtained here?

Yes. Specimens for Lab tests can be obtained at each facility and sent to a Lab. Some facilities have onsite x-ray capability. If your facility does not have this capability, your x-ray, as well as any more elaborate tests ordered, may require a trip to a hospital or elsewhere.

#### What if I need to be seen by a specialist elsewhere?

The facility provider will arrange for visits to outside specialists if they are needed. For security reasons, we cannot tell you when an upcoming outside appointment is scheduled.

#### Can I get medical screening tests done?

Many routine screening tests can be done here. These include tests for HIV (the AIDS virus), hepatitis C, syphilis, high cholesterol, and diabetes, among others. Skin testing for tuberculosis is required when you arrive at a facility.

#### Will I get the medicines I was taking before coming here?

Unless our provider determines otherwise, verified community prescriptions will be continued upon arrival until a provider sees you.

#### Why would my medication be substituted?

Just like Medicare and most health insurance plans, we have a *formulary*, which is a list of the medications preferred. What you are used to taking may or may not be on our formulary list. If there is good medical reason to depart from the formulary list you may get medication not on the list.

### How long will it be between the time I see the provider and the time I get the medication he or she has ordered?

Ordinarily a day or two. Urgent or Emergent medications can be obtained in an expedited fashion should this be required.

#### Can I get a copy of my medical record?

If your attorney needs a copy of your record, he or she can obtain it by filing a request with the Department of Corrections. The medical department does not make copies of records to give directly to inmates or others. You have a right to see your record and review it with medical staff. You must make an appointment to do so.

Patient Name	Inmate Number	Booking Number	Date of Birth	Today's Date

3

#### How do I file a grievance if I don't think I have had proper medical attention?

Grievance forms are available from your housing unit officer. They should be submitted through the facility administration. They will be logged and investigated. You should have a written response within 14 days of submitting the form. If you are not satisfied with the response, you may file a Level Three grievance. These will be assigned to the Inmate Advocate for resolution, if necessary. Copy of grievance process is on file in library.

#### Will you order a special diet for me?

Special diets are available for patients whose verified medical condition requires such a diet.

#### How do I get to see a dentist?

File a sick call slip about your need for a dental visit. A nurse will evaluate your request and you will be placed on the Dental list.

#### Can I get my eyes checked or get glasses if I need them?

There is an optometrist in the facility regularly. A sick call slip specifically asking for this service will get you on the list. Glasses are provided for those who need them and do not have them.

#### Can I get a Low bunk pass, extra pillow or extra mattress?

These items are available if our medical provider determines that you have a medical condition which requires them.

#### Can I obtain condoms?

Condoms are available upon request from the medical department.

#### TYPES OF MEDICINE AND TREATMENT

#### What sorts of pain medications can I expect to get?

Like any medical decision, choice of pain medication takes various factors about you and your problem into account. We use a lot of caution in prescribing powerful pain medications, including many of the ones, which are often used in the community. The medicines we do prescribe are effective for most problems, which cause pain, but a perfectly safe and effective pain pill has never been invented.

#### Are psychiatric medicines handled differently?

Psychiatric staff prescribes them, and they have a separate formulary and rules. Mental health staff and medical staff cooperate very closely at all facilities.

Patient Name	Inmate Number	Booking Number	Date of Birth	Today's Date

Whom do I ask about getting a sleeping pill?

You will need an evaluation and appt to discuss options for helping you to sleep better.

#### Can I continue a buprenorphine (Suboxone\*) program while at a correctional facility?

Vermont Department of Corrections policy may permit you to continue buprenorphine during an incarceration of thirty days or less. Many factors determine if you will be eligible to continue your suboxone. If you are not eligible to continue on Suboxone, we will work with you on detox efforts while you are here.

#### Can I get nicotine patches to help with not having cigarettes?

For security reasons, they are not available. The enforced smoking cessation, which comes with incarceration in Vermont, may be uncomfortable, but people actually manage it fairly well.

#### Can I get supplemental vitamins?

They are available when there is a good medical reason to need them. You can order vitamin supplements from the commissary if you wish.

#### What about herbal supplements and natural products?

Most of the things sold in these categories are not on our formulary and would not be available unless a strong medical case can be made for needing them.

#### **Intake Checklist**

D-ff- vt M- vv	17	T =	T =	T =	
Patient Name	Inmate Number	Booking Number	Date of Birth	Today's Date	
	1			1	

- 1) TB
- Re-Admission: If released for less than 30 days, TB does not need to be replanted
- b. New Admission and Re-Admission after 30 or more days, TB must be planted
- c. Reads must be scheduled 3 days from the day of implanted
- d. Schedule next year's TB plant (standard) and Read
- 2) Physical (H&P)
  - a. Re-Admission: If inmate has been released for less than thirty (30) days, schedule one year from their last health assessment.
  - New Admission or Re-Admission after 30 or more days, H&P needs to occur within seven (7) days then annually.
  - c. OOS transfers: Schedule based on one year from their last health assessment
- 3) Chronic Care
  - a. Re-Admission if inmate has been released for less than thirty (30) days and OOS transfer: maintain the previously scheduled appointment timeframe
  - New Admission or Re-Admission after 30 or more days, schedule within seven (7) days, coordinated with the H&P
    - i. Do not schedule (one) 1 year in advance unless ordered for review in (one) 1 yr.
- 4) Dental
  - a. Re-Admissions or OOS transfer: 2 years from last documented exam
  - b. New Admissions: Within one month
- 5) Appointments Scheduling
  - a. The nurse must review "views" to make sure there is no appointment scheduled for the patient or that scheduled appointments are scheduled for the correct time. If the appointments are not appropriate select the date and update the existing appointment.

Andrew A. Pallito	July 27, 2010 Date Signed	July 27, 2010 Effective Date	

#### **PURPOSE**

The purpose of this Interim Procedure is to establish procedures for the Department of Corrections' staff and contractors to follow in providing necessary alternative medical/dental and religious diets to inmates.

#### **POLICY**

It is the policy of the Department of Corrections to provide inmates who have a medical/dental or religious basis for a special diet, as well as to provide a vegetarian alternative, with the means to fulfill those dietary needs within inherent limited institutional resources and the need for facility security.

#### **AUTHORITY**

28 V.S.A, §101 (1) and 102 (b)(2). American Correctional Association Standards for Adult Correctional Institutions, 4<sup>th</sup> Edition 2003, Standards 4-4318, 4-4319, 4-4320, and 4-4517.
